Q: How to make a new label in the function of button I'm trying to make a new label to the function of the button, but I'm having problems to do that. This is my function when I click the button: @IBAction func viewEntidades(_ sender: Any) { viewEntidades() } I'd like to create a new label to every time I click that button, I tried with creating a new view and adding a label to it but I'm having problems to add the label to the function of the button.

A: Declare your label in ViewController's didSet block in ViewController's class: var labels = ["label_1", "label_2", "label_3"] { didSet { for i in 0..
