NIT Player Activation Code is a small utility designed with a single goal in mind: to simplify the entire process of listening to audio files online. This tool comes in handy for all users who want to enjoy listening to their favorite songs in an environment which doesn't display annoying ads or ask for setting up online accounts. program you should make sure you have previously installed Adobe AIR on your computer, otherwise you cannot continue with the installation procedure. NIT Player boasts a clean and intuitive interface that allows users to start the searching process on the breeze. In order to look for the needed songs, you only need to specify the artist or title of the songs in the dedicated box. The application displays the generated results in the primary

panel. What's more, you can create multiple playlists and add songs to them by using the "drag and drop" support. The program features a built-in player which allows users to play or pause the current audio selection, as well as skip to the previous or next track and repeat or shuffle the songs. You can also adjust the volume and delete the selected playlists. During our testing we have noticed that the program displays the search results very quickly

and without errors throughout the entire process. It doesn't hamper the system performance, so you can focus on other tasks as well, while listening to audio files. All in all, NIT Player is a small but powerful software solution which offers an intuitive layout and easy access to all its functions. Although it doesn't pack many dedicated parameters, listening to online audio tracks seems nothing but a piece of cake. In an analysis performed for the
