The BranchWallet is one of the fastest virtual currency wallets in the market because it takes less than a minute to transfer your money. The app works like Apple Pay, Google Pay and other virtual money wallets. Concept BranchWallet uses Branch.io's API to work. They claim that they have 100,000 ATMs in 60 countries. The wallet is not available in Apple's App Store or Google Play Store. Instead, it is available on windows platform. Branch.io is a mobile developer and platform that specializes in making APIs. They developed the app to make it easier to transfer, store, and use digital currency. History In 2018, BranchWallet was launched as a mobile payment app. It was born out of a partnership between Branch.io and Bitgo. The mobile app was created to keep users' funds safe and secure. Based in Silicon Valley, USA, the company offers many services. It manages to expand its services to merchants, fiat currencies, digital currency services and other payment related service. How to Use BranchWallet is a mobile application that users can download on their iOS, Android, Windows, or any other operating system. Once the application is installed, the user will have to login.
